IATF 16949:2016 Lead Auditor Training for 1st & 2nd Party Auditors

(By IATF Oversight (UK)

5 DAYS TO GO Course

SMMT DRIVING THE MOTOR INDUSTRY

Certification:

Delegates passing the written examinations will receive a qualification underwritten by the UK IATF Oversight Office, certifying you to deliver 1st and 2nd party IATF16949: 2016 audits.

Course overview:

This course is designed for auditors managing an organizations internal audit program and those undertaking 2nd party audits within the supply chain. Delegates should have a working knowledge of quality systems within the automotive sector and/or any previous auditing experience. This course will help auditors develop relevant skills in judgement, decision making, audit planning, audit non-conformity writing and subsequent close out related to the new IATF16949:2016 standard

Topics covered:

- Structure and principles of IATF16949:2016
- Structure of ISO9001
- Audit theory
- Auditor competence
- Process Approach Auditing Customer Specific Requirements (CSR)
- Core Tools Audit process
- IATF Rules for certification
- IATF Transition process

Benefits and Learning Objectives:

This participative course is made up of a number of modules supported by group exercises and open discussion. Delegates are evaluated through a proctored knowledge and application exam at the end of the course.
The practical emphasis of this course and high tutor to delegate contact provides a unique opportunity for a substantial degree of individual guidance and training. At the end of this course delegates will understand:
• The high level structure described within Annex SL including its impact on ISO9001 and IATF16949
• The concepts and application of risk based thinking
• The IATF16949 scheme structure and governance
• The IATF16949 requirements and the principles behind the standard
• The IATF16949 requirements around auditing and auditor competence
• Audit principles and how to develop their auditing knowledge to allow them to undertake effective process based audits
• How to use the Turtle diagram to plan audits and identify risks
• The approach to planning, undertaking, reporting (including nonconformity writing) and closing audits
• Customer Specific Requirements and how to audit them effectively
• An awareness of the Core Tools (APQP, FMEA, MSA,SPC and PPAP) and how to audit them effectively
